PROFILE

Data Science undergraduate at SLIIT with an integrated background in full-stack software engineering, data analysis and data engineering. Proficient in architecting **ETL pipelines, data warehousing, and Power BI reporting** alongside developing scalable web applications using **React, Node.js, and Spring Boot**. Leverages technical expertise in **Git, SQL, Python, R, and Java** to transform complex data into actionable business intelligence. Committed to deploying analytical rigor and robust software solutions to solve real-world business challenges

EDUCATION

BSc. (Hons) in Information Technology – Specializing in Data Science

Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka |
Expected Graduation: Dec 2027

PROJECT EXPERIENCE

Smart Campus Operations Hub – Facilities and Assets Management Module
Full-Stack Project | React, Spring Boot, MySQL | Mar 2026 - Apr 2026

- Implemented a MySQL-based campus resource management module with search/filtering, admin dashboard analytics, Excel reporting, QR tracking, AI-assisted equipment health scoring, and REST API integration

Accommodation Service Quality Analysis Using R

Statistical Analysis and Data Visualization Project | Jan 2026 - Jun 2026

- Analyzed a 3,000-observation, 14-variable dataset, cleaned and validated data confirming zero missing values and zero duplicates, performed feature engineering, and produced scatter plots, histograms, and a correlation matrix
- Applied ANOVA, t-tests, and regression analysis, identified **response time as the strongest negative predictor of satisfaction** ($r = -0.60$, $p < 0.001$), achieving **adjusted $R^2 = 0.88$**
